

Skidder Tire Mounted CME 750 All Terrain Rig

- TBTE's most powerful rig - the ultimate all terrain vehicle for drilling in remote locations including forests, swamps, bogs, mudded areas, and mountains.
- Easily transportable – the rubber tires will not damage paved surfaces.
- Mounted on a 4 wheel drive Flotation carrier (7.2 psi ground pressure). Low ground bearing pressure means less impact on the environment. Extremely important in environmentally sensitive areas such as parks, farms or golf courses.
- Dependable mechanical rotary has 13,000 foot pounds [17,628 Nm] of torque for auger drilling holes up to 16 inches [41 cm] in diameter.
- Powered with a Ford 300 inch 6 cylinder turbocharged diesel engine.
- Ideal for air rotary drilling, mud rotary drilling, and hollow / solid-stem auger applications. Can setup for wire line bedrock coring. Features a quick disconnect mast for drilling in low overhead areas.
- Hydraulic automatic hammer offers consistent blow counts.
- Commonly used for geotechnical and environmental drilling and sampling programs, installation of monitoring wells and piezometers, and pressure-meter testing of soil and bedrock. Capable of rock coring with BQ or NQ rod sizes.
