

Tri-pod Supported Cathead Equipment

- Consists of an aluminum Tripod system which is capable of mounting a motorized cathead to one of the legs.
- Tripod system can drive continuous split spoons or NW size drill casing, if required.
- This unit is beneficial in areas of bog where an all terrain vehicle is unable to travel.
- The tripod system is also useful in areas of side slopes as well as limited access areas where traditional drills cannot gain access
- The space requirements for this unit are approximately 12 feet in diameter and 10 feet of height.
